PROFESSIONAL SUMMARY

Agile Delivery Professional and Scrum Master with 5 years of experience across Salesforce and GTM systems, focused on driving reliable and scalable execution for customer-facing teams. At UKG, drives Salesforce-led GTM initiatives for Sales Enablement and Opportunity Management, partnering with Product, Engineering, and business stakeholders to plan delivery, manage backlogs, and keep releases predictable. Operates at the intersection of planning and execution — managing dependencies, identifying risks early, and coordinating across teams to ensure customer-facing commitments are consistently met. Leverages automation as part of the delivery strategy to improve release confidence and enable faster, stable deployments. Building toward delivery and program management roles to own end-to-end execution and scale Salesforce GTM systems effectively.

CORE COMPETENCIES

Delivery & Agile Leadership

Agile Delivery & Execution · Scrum Master · Release Planning & Delivery Accountability · Sprint Planning & Backlog Grooming · Cross-Team Coordination & Stakeholder Alignment · Requirement Understanding & Validation

Quality & Automation

Test Automation Strategy & Framework Design · Regression & Release Validation · Quality Risk Identification

Salesforce & GTM

Salesforce GTM Platform Delivery · Salesforce Sales Cloud · Salesforce Financial Services Cloud · Salesforce AgentForce · Salesforce Integrations (Seismic) · Apex Programming

Tools & AI

JIRA & Azure DevOps · Generative AI & Agentic Systems · Automation Tools (Provar, VS Code)

PROFESSIONAL EXPERIENCE

Senior IT Software Engineer

UKG (Ultimate Kronos Group)

Noida, Uttar Pradesh, India · Hybrid

Dec 2025 – Present

6 months

Driving Salesforce-led GTM delivery across Lead-to-Opportunity workflows as Scrum Master.

- Serve as Scrum Master for GTM team, ensuring predictable sprint execution and steady delivery cadence
- Work closely with business stakeholders during refinement to understand unclear requirements and turn them into actionable, engineering-ready user stories
- Partner with Engineering on solution approaches, trade-offs, and realistic timelines, staying hands-on to assess implementation complexity
- Drive automation as part of the delivery process to improve release confidence and support stable, high-quality releases

IT Software Engineer

UKG (Ultimate Kronos Group)

Noida, Uttar Pradesh, India · Hybrid

Dec 2024 – Dec 2025

1 year

Worked on Salesforce-based GTM systems, contributing across automation, engineering, and Agile delivery for Lead-to-Opportunity workflows.

- Collaborated with Product, Business Analysts, and Engineering on backlog refinement to ensure user stories were clear and execution-ready
- Built and maintained UI and API automation to support stable releases, improve test coverage, and reduce manual effort during delivery cycles
- Gained hands-on experience with implementation and solutioning, working closely with developers to understand system behavior and support better estimation
- Actively identified risks, resolved blockers, and supported smooth sprint execution across the team

Quality Engineer

LTIMindtree

Bengaluru, Karnataka, India · Hybrid

Supported Agile delivery teams on Salesforce Sales Cloud and Financial Services Cloud workflows, with integrated platforms including Seismic.

- Owned functional and regression validation for multiple Salesforce features across Sales and Financial Services use cases, ensuring release-ready quality
- Built and maintained 300+ automated test cases across UI and integration flows, reducing post-deployment issues and improving release stability
- Collaborated with Salesforce developers, BAs, and stakeholders to review requirements and provide early quality risk feedback
- Supported CI/CD pipelines by validating builds across environments; participated in sprint planning, backlog grooming, and retrospectives

Nov 2022 – Dec 2024

2 years 2 months

Test Engineer

Mindtree

Pune District, Maharashtra, India · Hybrid

Worked on Agile delivery teams supporting Salesforce Sales Cloud and Marketing Cloud applications.

- Executed functional and regression testing across Salesforce releases to maintain stability as new configurations were introduced
- Collaborated with developers, BAs, and stakeholders to clarify Salesforce workflows and identify gaps early in the delivery cycle
- Contributed to automation and repeatable validation for Salesforce workflows to reduce manual overhead and support faster releases
- Participated in sprint planning, backlog discussions, and retrospectives with quality and feasibility inputs

Jun 2021 – Nov 2022

1 year 6 months
